

Pharma-Corp drug guidelines

Lisinopril and Ascorbic Acid

Document ID: SOP-154 **Title:** Lines 2 & 3 Operations - Solids and Supplements

Department: Manufacturing (Lines 2 & 3)

1. Line 2 Product: Lisinopril

- **Standard Batch Volume:** A standard batch yields 15,000 units.
- **Storage and QA:** Lisinopril tablets are highly sensitive to humidity. Ambient humidity on Line 2 must not exceed 45%. If humidity exceeds 50% for more than 30 minutes, the batch is flagged as "QUARANTINE_HUMIDITY".

2. Line 3 Product: Vitamin C (Ascorbic Acid)

- **Standard Batch Volume:** A standard batch yields 25,000 units.
- **Storage and QA:** Vitamin C requires opaque amber bottling to prevent UV degradation. No temperature controls are strictly required for Line 3 beyond standard room temperature (20°C - 25°C).
